

Preparing for the "Soil Deal for Europe" Mission

PREPSOIL facilitates the deployment of "Soil Deal for Europe" mission across European regions, by helping key-players beyond agriculture field in reducing soil degradation, while increasing soil awareness and soil literacy.

A soil deal for Europe

Soil awareness and soil literacy are going to be a hot topic in the next decade. Today the European Union estimates that between 60 and 70% of EU soils are unhealthy.

PREPSOIL will be a one-stop shop to increase networking and knowledge exchange between communities across Europe at the regional/local level on soil health taking into account various types of land uses and based on the work undertaken in existing and new Living Labs and Lighthouse farms.

Who does PREPSOIL help out?

Academia & Innovation

Land Managers/
Owners & Farmers

Companies & businesses

NGOs

Students & Citizens

Authorities & Soil Monitoring Agencies

Funded by
the European Union

How does PREPSOIL support the healthy soils transition?

- Improve the knowledge-base on soil health
- Establish an overview of soil needs and status
- Increase soil literacy and skills
- Addressing different land uses: agriculture, nature, forestry, urban and (post) industrial
