

## Join forces to support the "Soil Deal for Europe" Mission!

PREPSOIL is an EU-funded project which supports the deployment of the "Soil Deal for Europe" mission to reduce soil degradation, while increasing soil awareness and soil literacy in all land-use cases throughout Europe. PREPSOIL provides tools and spaces to facilitate knowledge exchange, capacity building and cross-regional connection such as its Communities of Practice and the Multilingual Soil Knowledge-Hub.

### Communities of Practice

A PREPSOIL Community of Practice (CoP) is a group of actors that jointly addresses a known threat to soils in their territories through identified actions, or that promotes adoption of alternative soil management models to ensure that the capacity of soil to deliver ecosystem services in the long-term is preserved.

**Are you part of a Community of Practice? Then join us on PREPSOIL to increase your visibility and interact with similar communities!**

**Browse and interact with CoPs**

**Join the Knowledge-Hub**

### Multilingual Soil Knowledge Hub

The Multilingual Soil Knowledge Hub is a multi-language, online library that provides access to numerous resources including best practices, policy recommendations, experiments, video materials and publications focused on different aspects of soil health in Europe.

Curated by PREPSOIL the Knowledge Hub provides educational and scientific resources produced by European projects & organisations, EU institutions and Academia addressing the most pressing challenges for our soils.

**Discover our list of resources and start acquiring new knowledge on how to improve soil health!**
