

# Share & Collect Knowledge on Soil Health

**NEW  
MOBILE  
APP**

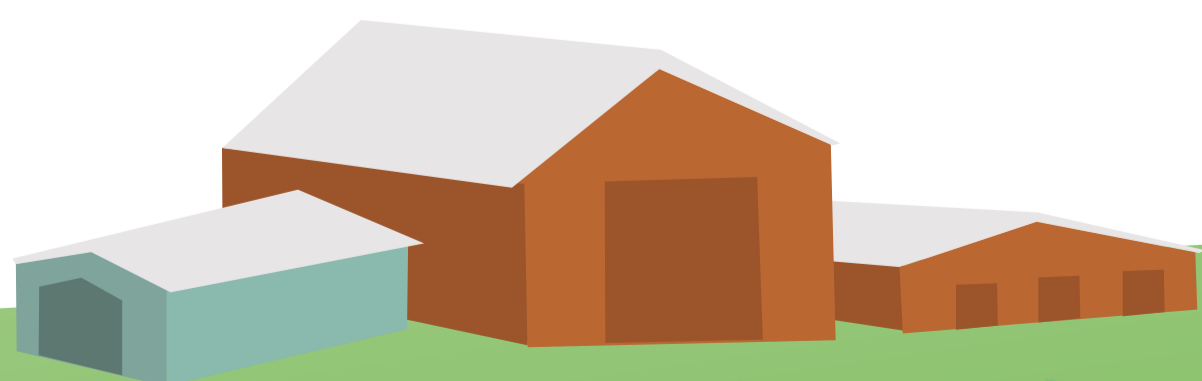

Funded by  
the European Union

# Learn & share knowledge on SOIL with the **PREPSOIL** Mobile App!

The **PREPSOIL Mobile App** is a free digital solution helping citizens to acquire knowledge about soil health and supporting research with real-life soil observations.

The PREPSOIL Mobile App provides an interactive space for citizens to learn about soil and contribute with their observations to the work of universities, institutions, and soil initiatives around Europe.

iOS

Android

# Download the PREPSOIL Mobile App

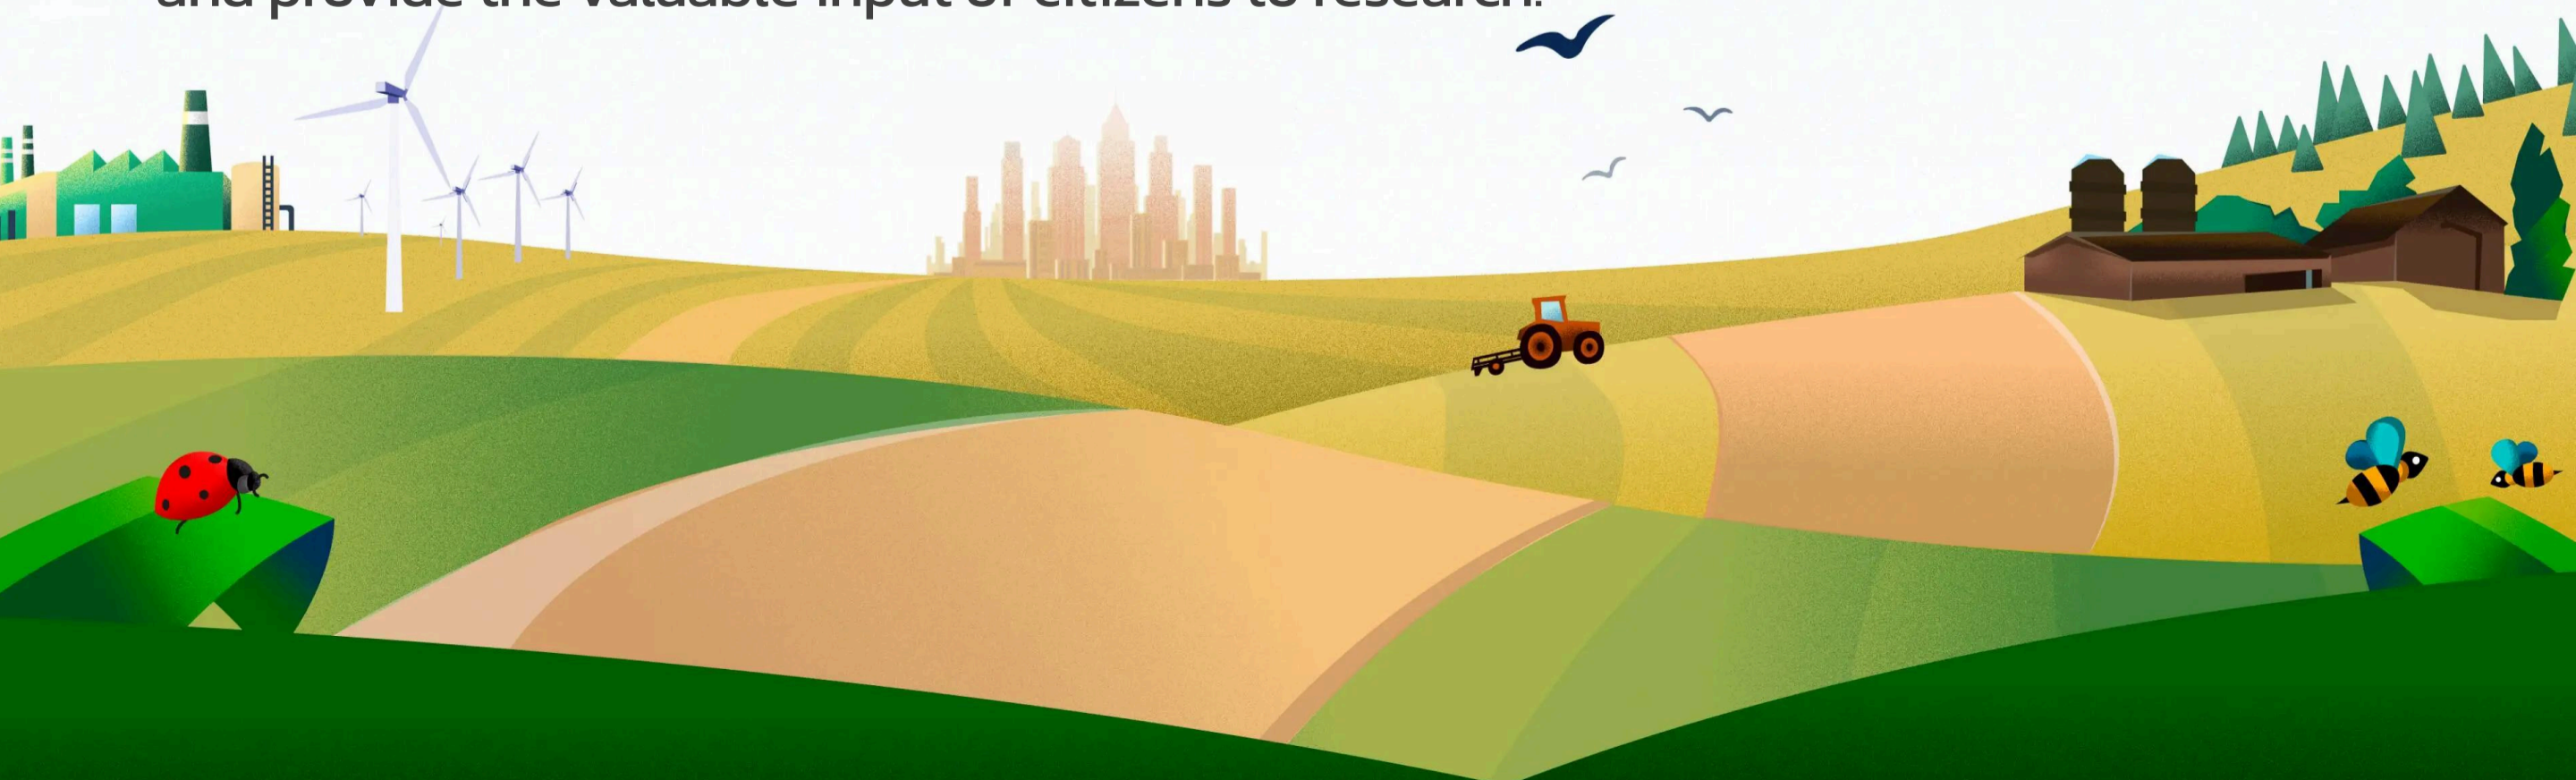

PREPSOIL cooperates with a broad range of organisations, initiatives, research centres, institutions that work on improving soils.

All of them can create a **quest** on the PREPSOIL mobile app to obtain more information on soils from citizens.

**In a quest, an organization can ask citizens from a specific region to:**

- **upload images of soil**
- **provide details about the soil structure**
- **or describe a common soil issue in a specific area**

These insights can help to expand the knowledge on soils in different areas and provide the valuable input of citizens to research.

**Are you an organization, initiative, research centre, university or community working on improving soils?**

**Fill out the webform and let's create your first quest on the PREPSOIL Mobile App!**

**[Webform to submit your ideas for a quest](#)**

# Exploring PREPSOIL Mobile App's Advantages

## Essential Features of the PREPSOIL Mobile App

The app provides three different types of opportunities:

### **DISCOVER THE PREPSOIL RESOURCES**

Get access to the PREPSOIL Knowledge Hub, Living Labs & Lighthouses map, PREPSOIL TV and much more to gain knowledge on soil health and soil issues around Europe.

### **GET UPDATES & INSIGHTS ON SOIL HEALTH**

Keep updated on the new publications, videos, and other materials released by PREPSOIL that will help you to become an expert in soil!

### **TAKE THE QUESTS**

Participate in the PREPSOIL quests and contribute with your observations on soil! The quests are opened by organisations, initiatives, universities across Europe to obtain more information about the soil health.

**Find a quest next to you and help organisations to obtain information about soil in your region.**

# How do the quests work?

PREPSOIL cooperates with a broad range of organisations, initiatives, research centres, institutions that work on improving soils. All organisations can create a quest on the PREPSOIL mobile app to obtain more information on soils from citizens.

In the quest, an organization might ask to upload images of soil from a specific region, provide some details about the soil structure or describe a common soil issue in a specific area.

The observations help to expand the knowledge on soils in different regions and provide the valuable input of citizens to research.

## **Benefits for researchers, soil initiatives, and organisations**

- Create quests to obtain real-time observations from citizens, such as pictures, information, overview of soils
- Engage with citizens and a broad range of users on soil topics
- Get access to an open map showcasing the soil issues reported by citizens around Europe
- Become part of a vibrant community focused on increasing soil literacy

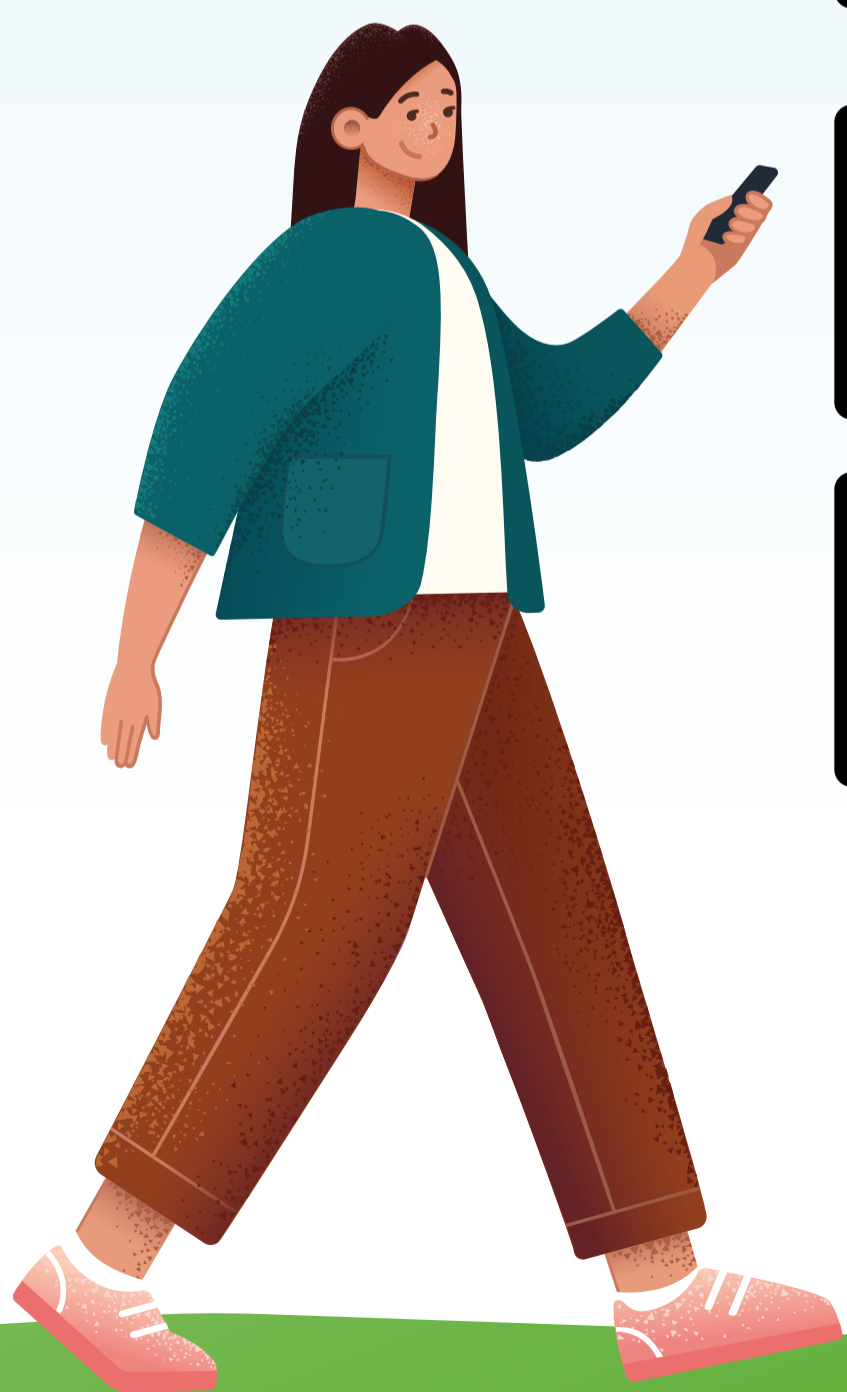

## **Benefits for citizens and soil enthusiasts**

- Gain knowledge on soil health and how to tackle soil degradation
- Access multiple tools and resources and become a PREPSOIL Soil Expert
- Connect with soil organisations and initiatives and contribute to their work by participating in Soil Quests
- Obtain the opportunity to report on soil issues and take an active role in protecting our soils

# How to access the PREPSOIL Mobile App?

The PREPSOIL Mobile App is available on iOS and Android!

Download the PREPSOIL Mobile App and contribute to expanding knowledge on soil health!

## About PREPSOIL

**It is estimated that between 60–70% of European soils are unhealthy.**

The European Union's Soil Mission implementation plan lists multiple societal needs from healthy soils. To meet these demands, the PREPSOIL project is supporting the implementation of the Soil Mission by developing interactive spaces that facilitate knowledge exchange on soil and co-learning among stakeholders in regions across Europe.

With a consortium of 19 partners that represent leading European and national initiatives on soil health, PREPSOIL has already delivered such tools as:

- **an updated map of Living Labs & Soil Lighthouses**
- **the Knowledge Hub, a multi-language online library that provides access to over 200 resources focused on soil health**
- **a Forum to facilitate knowledge exchange between Communities of Practice and incentivize discussions on soil issues**
